

# TALLY LIGHT DETECTOR

Feb97

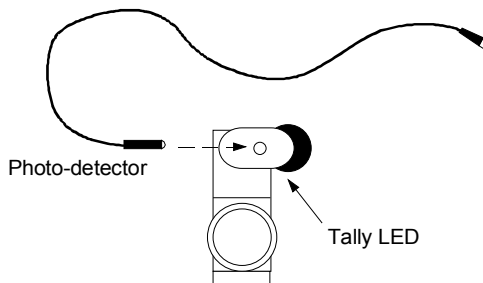

If you are missing any of the following items contact Stanton Video immediately (602) 493 9505

1. Photo-detector
2. Amplifier Box
3. Battery Cable

## INSTRUCTIONS

1. Gaffer tape the Photo-detector over the camera tally light. Make sure that you use enough tape to prevent light from leaking into the detector.

2. Connect the detector to the 4 pin Auxiliary.
3. The Battery Cable has a power tap to allow the Amplifier to be run off the battery pack. Connect the Battery Cable in the usual manner and then plug the Amplifier Box to the Battery Cable.
4. Attach the Amplifier Box to the side of the control box with Velcro.
5. Adjust the sensitivity (threshold at which the light will come on) by the pot adjustment on the Amplifier Box
